Items of Practical Interest to People with Practical Minds.

Mr. John C. Goodridge, Jr., has suggested a project for modifying the climate of the Atlantic coast by closing the Strait of Bell Isle, and advances the theory that Gulf Stream, it veers southward in the form of a loop, and finally, running us der it, goes on toward the equator. That part of the Gulf Stream that passes our passes has a course directly possible and six of the storage. Every and six of the Gulf Stream that passes our passes our passes a course directly possible and six of the Gulf Stream that passes our passes our passes as a course directly possible and six of the Gulf Stream that passes our passes as a course directly possible and six of the Gulf Stream that passes our passes as a course directly possible and six of the Gulf Stream that passes our passes as a course directly possible and six of the Gulf Stream that passes our passes of the Gulf Stream that passes our passes as a course directly possible and six of the Gulf Stream that passes our passes of the Gulf Stream that passes our passes of the Gulf Stream that passes our passes as a course directly passes as a course directly passes of the Gulf Stream that passes our passes our passes of the Gulf Stream that passes our passes our passes of the Gulf Stream that passes our passes our passes of the Gulf Stream that passes our passes of the Gulf shores has a course directly north and s be vels, and promote eigestien, take little west, is deflected slightly toward the of Carter's little Live Pills event in east by the coasts of South and of North Try them. Carolina, and thence turns more to the north again, when it is deflected by the cold current returning from the pole. When this cold current is of least strength, as in August and September, the Gulf Stream comes within ten miles of Barnegat; at other times it is distant 120 | Special to the Gazette. miles, changing with the amount of the that we should have a less stormy coast, as the juxtaposition of these two currents with their difference in temperature must from that circumstance tend to an unstable condition of atmospheric equilibrlum. Our cold northwest winds would then sweep to the north of us and become westerly and southwesterly winds .- [Popular Science Monthly.

Dr. George M. Sternberg confirms, in a communication to the Johns Hopkins University, as a result of his own observation, Laveran's discovery of the germ, er micro-organism, of malaria. Laveran amorboid parasite in the blood of patients suffering from fever, and also observed that the germs disappeared from the blood when quinine was administered in effective doses. During a recent visit to Rome Dr. Sternberg was present at a most satisfactory demonstration of the presence and amorboid movements of the parasite in blood drawn from the flager of a patient in the first stage of malarial paroxysm. Types of intermittent fever brought him to Sherman where he was interests of, and the upbuilding of our had been induced in previously healthy camped in the suburbs of the city with country. I consider the fountain of inpersons by injecting into the circulation the gold bricks in his possession. Little- formation which fills the columns every malarial patient during his fever. The presence of the parasite in the injected blood was demonstrated, and it was found again in the blood of the persons subjected furnish the means to work it. CHICAGO, ILL, May 14.-The wheat market opened 4t 86%c for June, and for some minutes fluctuated between 86%c and 86%c, and then %c; 10-th cans, 8c; 5-th cans, 8%c; 3-th cans, took an upward shoot to 86%c on a little show of ouying by the clique brokers, in the meantime long futures were very weak; August opened at 83%c and sold down to 83%c; as the session advanced business became duller. There were no orders from the outside and the whole day's transactions were practically between the brokers. Just before the close at l o'clock, Irwin Green came in and bought June wheat freely, and the crowd got very nervous, and all or nearly, all of were arrested, and the parasite disapwere arrested, and the parasite disapit is generally known that he has money

Up to this date nearly all of the has been quiet since the close of the look when quining was run up to 87c, where it closed Corn pened rather easier than vesterday's close; July started %c easier, at 4 c, and held steady around 40% @41c; several times it broke to 40% c during the morning, but good baying invariably brought it back again to 40% c, at which figure it closed. Provisions were very dull and weak all day, though opening prices lard sold from \$6 72% down to \$6 62%, and July ribs down to \$7 12%; there was no unusual selling, but all pork product broke from its own weight; both, however recovered someown weight; both, however recovered somewhat toward the close, July ribs closing at \$7 17½, and July lard at \$6 75. Leading futures closed as follows: Wheat, No. 2, May 85½c; June 87c; July 85½c; August 83½c. Corn—No. 2, May 38c; June 39c; July 40½c; August 42c. Mess pork—May and June \$21 00. Lard—May \$6 60; June \$6 65; July \$6 75; August \$6 82½. Shortribs, per 100 pounds—May \$7 02½; June \$7 05; July \$7 17½; August \$7 274. Cash quotations: Flour-Steady and firm. No. spring wheat 85%c; No 2. red 86c No. 2 corn 38c. Mess pors \$20 75@21 00. Lard \$6 60 @6 62%. Short ribs sides (loose) \$7 00 Dry salted shoulders (bo ed) \$5 60@5 70. Short clear sides (boxed) \$7 45@7 50.
